#### ABSTRACT

Dr. Dudakov graduated with a PhD in Immunology and Stem Cell Biology from Monash University, and completed a postdoctoral fellowship in the Immunology Program at Memorial Sloan Kettering Cancer Center in New York. In 2016 Dr. Dudakov moved to Seattle to establish his lab in the Clinical Research Division at the Fred Hutchinson Cancer Research Center. He is an Assistant Member of the Program in Immunology, and a Member of the Immunotherapy Integrated Research Center at the Fred Hutchinson Cancer Research Center, and an Assistant Professor in the Department of Immunology at the University of Washington. His research is focused on understanding damage and regeneration in the thymus; an organ critical for the development of T cells, a fundamental arm of the adaptive immune system.
